Library Footfall

Method of Computing Footfall

1. Method of computing per day usage of Library: **Issue-Return Register + Student & Staff entry register**
2. Number of users using library: **720 Registered users of Library**
We assume 10% daily usage i.e. *72
3. Number of physical users accessing library: **203*** per day users**

Formula

Number of teachers and students using library per day

X 100 =

Total no. of Teachers & students

$$72 + 203$$

$$\dots\dots\dots \times 100 = 38.19\% \text{ per day users}$$

$$720$$

*Due to online classes, we expect this number to be higher

***203 has been calculated as the average of students footfall using five4 random library days and assume it 30 teachers on a daily basis.

Calculation for 203-library physical user per day:

(Sum of number of students using library on five random days)/5 + Teachers

$$= 176+173+182+214+123/5+30=203$$
